Instructions for Airtable

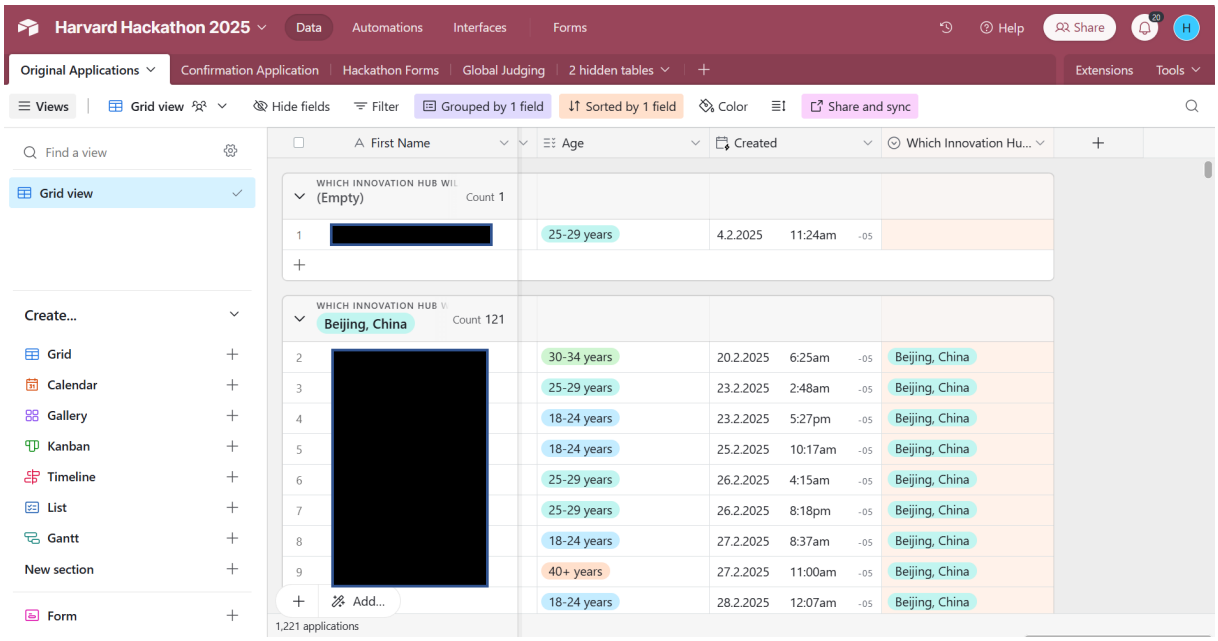
Access to HSIL Hackathon Workspace:

All hubs should have access to the HSIL Hackathon workspace in Airtable. If you haven't received an invitation or are unable to access the workspace, please contact alemosman@hsph.harvard.edu for assistance. Access should be granted automatically once you've been added to the participant list. If you encounter any issues, make sure to check your spam folder for the invitation email.

Step-by-Step Instructions

1. Access the Airtable Base:

- Open the Airtable link provided to access the HSIL Hackathon workspace. You can find the applications list under “Original Applications”.

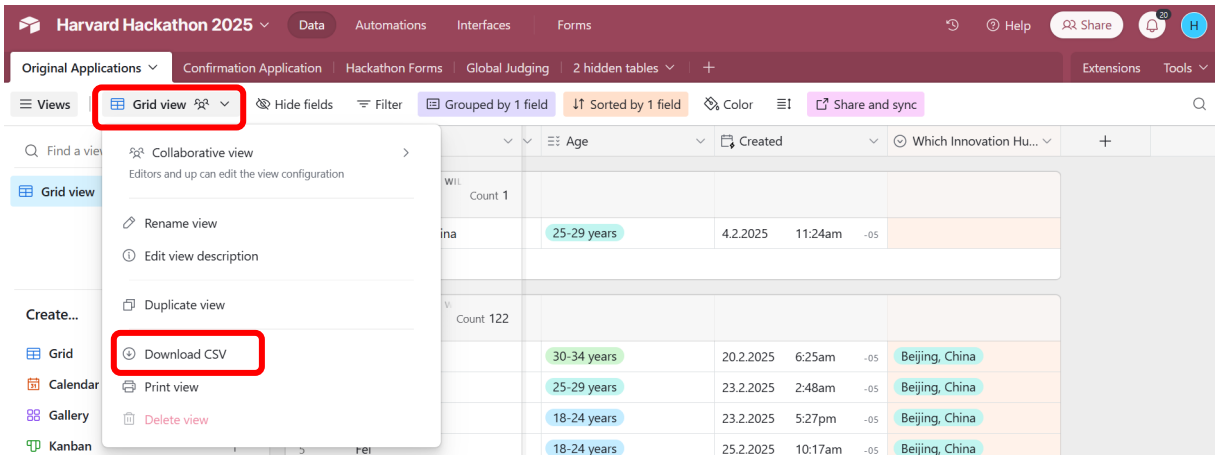


2. Navigate the Applications List:

- View by City: You can find your hub’s applications and an application count grouped by city. Scroll through the list or use the search function (magnifying glass icon) in the toolbar to quickly find your specific city.

3. Download the List:

- Click on the "Grid view".



- Choose “Download as CSV” to initiate the download.

- Save the file to your desired location on your computer for easy access.
